Checkpoint 10 sprint 5 assessment 10-06-2025

Matviienko, Andrii A.Y. 4 days ago

I showed the teacher my personal project, the results regarding the implementation, the unit of tests, the outflow of Nginx through the dock, the documentation, and the SPECOLE Document. The teacher advised to ask Jesse regarding the RESERCH document, because in the current state there is no How and Who in it. Only What. Also, the teacher advised to add more E2E tests (I had only 1). Also, the teacher said to finish the functionality, and add any charts and analytics to the admin.

Checkpoint 9 F12 - Maja 16-05-2025 🔒

Matviienko, Andrii A.Y. a month ago

I showed the teacher my progress regarding authorization, working token generation, limiting some backend endpoints by user role, asked questions about the correctness of my structure, to which I received the answer that my structure is quite good, and I have good progress.

Checkpoint 8 W10 Sprint 3 assessment 25-04-2025

Matviienko, Andrii A.Y. a month ago

Showed my personal project to the teacher. The teacher said that I should correct some promises in the project plan, add testing there. I should add a frontend to the design document. Also, there was a question regarding docker deployment in the pipeline.

Checkpoint 7 Week 9: Progress check - Coach talk 16-04-2025

Matviienko, Andrii A.Y. a month ago

I discussed all the questions that interested me with my personal coach. I expressed my concerns about possible sleep failure, which was subsequently refuted by the coach. I also asked for help in determining further paths of study and choosing a specialization.

Checkpoint 4 F6 - Maja 28-03-2025 🔒

Matviienko, Andrii A.Y. 3 months ago

I showed my teacher all my progress on a personal project. Backend, password encryption, frontend, and docker containers. The teacher said that all of this was at a sufficient level for this Sprint 2 submission.

Checkpoint 3 Week 5/6: Semester Coach Talk - Sprint 1 16-03-2025 🔒 🙂

Matviienko, Andrii A.Y. 3 months ago

I showed the teacher everything I had done, including all the endpoints I had made in the backend, the documentation (project plan), and everything I had done on Jira. The teacher advised me to fix some things in the project plan, and add Acceptance criteria to Jira.

Matviienko, Andrii A.Y. 3 months ago

I spoke with my semester coach (Jessie). Jessie praised the group project and also noted the improvement in my interaction compared to last semester. If before I was quiet and not particularly outstanding, then this semester, due to the role of product owner, I became more sociable in presentations, and this is a great change, as the teacher noted. Also, I learned that I am a little behind regarding the personal project

Checkpoint 2 F3 - Maja 28-02-2025

Matviienko, Andrii A.Y. 3 months ago

I showed my teacher my progress on my personal project. We also discussed my pipeline issues. I asked the teacher if it was possible to use qodana from Jetbrains. The teacher replied that she had no problem with it. I also asked about the necessary deliverables for this personal project submission (Sprint 1)

Checkpoint 1 W1 - Maja 12-02-2025

Matviienko, Andrii A.Y. 4 months ago

Today I told my teacher about my personal project idea. As an idea - a social network in the style of SpaceHey (however, I'm not sure that with the same retro design straight from the 2000s).

The teacher liked the idea. We also discussed the difficulty of creating a custom page with custom html. We agreed that if the idea was too complicated, I would forget about it and make it simpler.
